Servicing The Industry for over 40 Years

Thank you for taking the time to browse our catalogue, which covers the entire range of products, solutions and services available from All Stake Supply.

We continue to provide and source where needed, good quality products and services to meet the demands of our customers. With over 1,000 products under one roof, chances are we already stock it or make it ourselves, but if we don't, we will tap into our constantly growing international network of suppliers and find the right product on your behalf.

We at All Stake Supply have freighted thousands of pallets of product on our own trucks, with a regular service that delivers around the greater Sydney basin every day. Our service includes runs to Wollongong, Canberra and Newcastle areas to reach the demands of a growing customer base, all at a low cost to you.

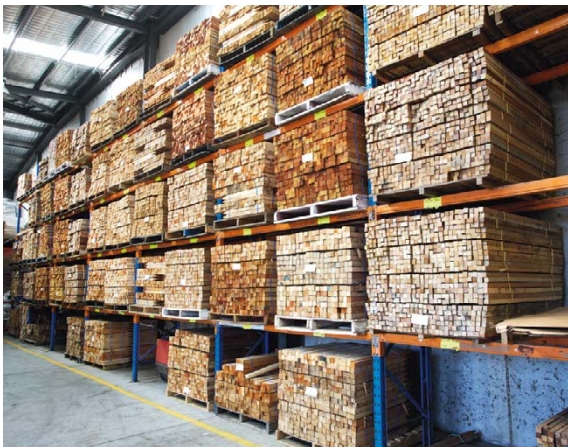

We also provide transport logistics for customers in NSW and Interstate through our transport partners. So if you need goods, we'll get them to you.

We continue to make ordering and getting product information easy. We have a toll free number with friendly staff ready to take your call. We also have an informative website which contains product specifications, latest product news, eNewsletters and easy email access to our sales representatives who will respond to your emailed questions and take your orders. We are only one phone call or one click away.

*Thank you for your interest.*

All Stake Supply has the **product range to help you meet all your erosion control needs** from a simple silt fence on a new home site to the use of Coir Logs for stream bank stabilisation.

## JUTE MATTING ▼

- An organic geotextile which aids in weed and erosion control
- The jute mat forms a mulch which suppresses weed growth and increases moisture retention in the soil to aid in the establishment of long term vegetation
- 100% biodegradable organic product made from Jute Fibre
- Can be fastened with "U" shaped pins

*Tip*

3 Pins per M<sup>2</sup>

## SPECIFICATIONS

1.83metres Wide x 25metres Long  
(Covers 45.75M<sup>2</sup>)

- Medium (620gsm)
- Medium (620gsm) (5 slits per M<sup>2</sup>)
- Heavy (750-800gsm)
- Heavy (750-800gsm) Slitted (6 slits per M<sup>2</sup>)

**COIR MATTING** ▼

- Coir matting is a 100% biodegradable natural fibre product.
- When used with vegetation it is mechanically strong enough to hold slopes together even after heavy rain. Also promotes the growth of new plants
- Can last for up to five years with optimum seasonal conditions.

**SPECIFICATIONS**

Roll size 2 x 25 metres covers 50M<sup>2</sup>  
 Thickness (Light) 4mm (Medium) 7mm (Heavy) 9mm

◀ **WOVEN POLY WEEDMAT**

- A woven polyethylene fabric made for weed control in nurseries, landscaping and horticulture
- Tight enough to prevent light reaching the soil so weeds cannot grow, but allows air and water to pass through to prevent soil souring
- Exceeds Australian standards 2001.4.21 - 1979 and 2001.2.3.1 - 2001

**SPECIFICATIONS**

0.9 x 50metres, 80gsm  
 1.83 x 50metres, 80gsm  
 3.66s x 100metres with Grid Line, 120gsm  
 5 x 100metres with Grid Line, 120gsm

**FILTER FABRIC (NON-WOVEN)** ▼

- Provides protection of one strata from damage by another
- Stabilises soil whilst retaining porosity for water to flow
- Used for erosion protection, road stabilisation, reinforcing retaining walls, and for wrapping ag-pipe

**SPECIFICATIONS**

1.0 x 25metres, 120gsm  
 0.6 x 50metres, 120gsm  
 1.0 x 50metres, 120gsm  
 2.0 x 50metres, 120gsm  
 4.0 x 100metres, 140gsm  
 4.0 x 200metres, 270gsm

**STEEL FASTENING PINS** ▼

- Used for securing matting, the base of fencing, and bird netting to prevent movement
- Longer pins are required for soft ground or steeper slopes
- Made from steel with sharpened ends for easy penetration

**SPECIFICATIONS**

(Length x Width x Gauge)  
 150mm x 30mm x 4mm  
 200mm x 35mm x 4mm  
 300mm x 50mm x 5mm

**BIOPIN™ & APPLICATOR GUN** ▲

- The BioPin™ is a 100% biodegradable pin used to anchor erosion control blankets and turf. An Environmentally friendly alternative to wire pins with superior anchoring strength.
- It's made from naturally occurring plant sugars and vegetable oils.
- Water resistant and will not soften from moisture during storage

- 1 Reinforced shoulders increases strength
- 2 Barbed head for better holding
- 3 Cross member body creates more strength
- 4 Applicator slidee guides
- 5 Reversed barbed head for higher pull resistance

**SPECIFICATIONS**

100mm (32.5 x 32.5 x 25)  
 150mm (47.5 x 37.5 x 32.5)  
 Available in (Boxes of 1000)

**APPLICATOR**

- Quicker installation process
- Applicator will install the 100mm and 150mm BioPins
- Light weight and easy to use

◀ **JUTE SOIL SAVER (MESH)**

- An organic loose woven jute mesh used for erosion control, to hold seeds intact, and prevent soil erosion
- An economical form of erosion control suitable for large projects
- 100% biodegradable organic product made from Jute (hessian)

**SPECIFICATIONS**

470G/M<sup>2</sup>, 20x20mm Grid  
 1.2 x 65metres (Covers 79M<sup>2</sup>)  
 1.2 x 550metres (Covers 660M<sup>2</sup>)

**Tip**  
4 hardwood stakes to hold

**FILTER TUBE** ▼

- A barrier which can be used to prevent sediment pollution of drains
- Fill with sand, gravel, or a specialised filter material

**SPECIFICATIONS**

**Standard Black:**

1metre 270G/M2, Filled Diameter 150mm, Flat 230mm  
2metres 270G/M2, Filled Diameter 150mm, Flat 230mm  
Available in 50metres continous

**Premium Green** (made from durable silt fence material):

1metre 90G/M2, Filled Diameter 150mm, Flat 230mm

**COIR LOG SILT BERMS** ▲

An environmentally friendly alternative to hay bales and expensive Rip Raps or cement stabilisation techniques, Coir Fibre Logs are ideal for constructing check structures, managing changes in stream flow velocity, shaping channels and stabilising shorelines. A natural planting medium for vegetation and made from 100% coir (coconut) fibre, Coir Fibre Logs are a totally biodegradable material that last up to four years. They are easily installed and will blend naturally into the environment over time.

- A large hessian roll of 100% biodegradable coir made from organic coconut fibre
- Can be fixed in swail for sediment retention, and around wetlands and stream banks for wave mitigation
- Provides protection until natural vegetation is established

**SPECIFICATIONS**

3metres Long x 300mm. Square, Weighs 33kg  
3metres Long x 300mm. Diameter, Weighs 25kg  
3metres Long x 200mm. Diameter, Weighs 16kg  
3metres Long x 150mm. Diameter, Weighs 12kg

**SAND BAGS**

- Sandbags with tie string attached
- Used for a multitude of purposes in civil and construction works
- Temporary retaining walls
- Flood protection
- Severe weather events
- Stabilise road signs

**SPECIFICATIONS**

370mm x 860mm  
Available in Hessian, Poly or Premium Green

WEBBING HANDLE FOR EASE OF USE

*Did you know?*

These bags are sold 'empty'

**HAY BALE BAGS**

- Enhances the longevity of hay bales
- Increases the amount of sediment trapped and filtered by the bale
- Includes webbing handles to pin the structure in place
- Made from UV stabilised non-woven polypropylene

**SPECIFICATIONS**

Single Hay Bale Bag

*Tip*

1 hardwood stake through handle

**HESSIAN**

- A tightly woven hessian fabric which is suitable for protecting root balls during tree transplanting, and as a short-term site screen
- Can also be used to maintain moisture in soils and turf, and for seeding
- Folded for ease of application

**SPECIFICATIONS**

1.8metres x 50metres

**BIRD NETTING**

- Protects plants from birds and vermin damage
- Can be used for the protection of crops and wetlands
- Made from UV stabilised polyethylene net

**SPECIFICATIONS**

6metres x 250metres, 20 x 20mm grid (White)  
5metres x 100metres (Black)

IN WHITE OR BLACK

**Snip! Snip!**  
We can custom cut to your specifications.

**ROOT BARRIER** ▶

Tree and plant roots can aggressively invade surrounding areas, causing major damage to paths, roads, services and retaining walls. Root Control Barrier is a flexible High Density Polyethylene (HDPE) membrane that restricts unwanted and invasive root growth particularly in streetscapes.

Keeping the roots out and the moisture in, Root Barrier is light and easy to install and offers a far greater cost efficiency than expensive and inferior methods such as concrete, fibre cement sheeting and sheet metal.

- Stops the spread of roots to unwanted areas
- Reduces damage to walkways, driveways, roads, and building foundations
- Easy to install, cut to shape and is cost effective
- UV stabilised high-density Polyethylene ensures long-term protection

**SPECIFICATIONS**

Black 1000µm, 1mm thickness.  
Pre cut rolls available; 0.45x50m, 0.5x50m, 0.6x50m.

**SITE PRIVACY NETTING** ▼

- Light weight woven fabric used for surrounding work sites or creating exclusion zones
- UV stabilised for longer life
- Suitable for short term or long term site privacy containment
- The most economical method of creating a private zone
- Blue or Green available

**SPECIFICATIONS**  
1.8metres x 50metres in  
Blue or Green

▲ **AG-PIPE**

Agriculture pipe is a corrugated pipe used for sub soil drainage. It comes slotted and unslotted, with or without a sock cover in various diameters.

- Used in commercial and residential landscaping
- Construction sites
- Socked ag-pipe provides a sediment filter for the pipe

**SPECIFICATIONS**

65mm x 20m  
65mm x 100m  
100mm x 20m  
100mm x 100m  
Each socked RTA approved

**Tip**  
Site Privacy Netting is more economical than shade cloth and provides lower wind resistance.

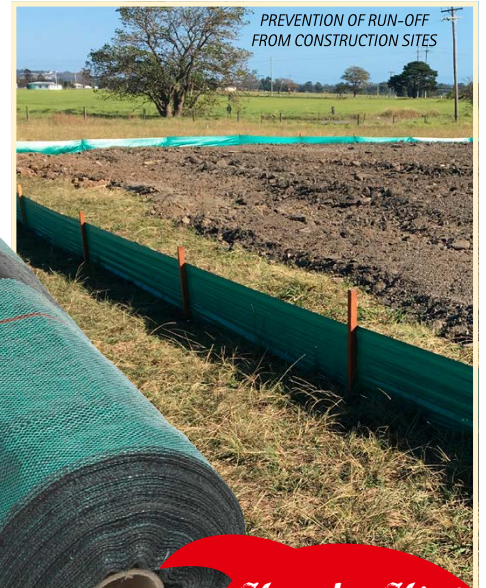

**SILT FENCE** ▶

- A woven mesh filter fabric designed to contain sediment while allowing drainage
- UV stabilised for all types of outdoor conditions and applications
- Different sizes and grades are available for all applications
- Meets Australian Standards

**SPECIFICATIONS**

- Standard 0.77 x 50metres
- Economy 0.77 x 100metres
- Economy 0.77 x 500metres
- Standard 0.86 x 100metres
- Economy 0.86 x 500metres
- Standard 0.86 x 100metres
- With Tie, Premium

*Kandy Kint*

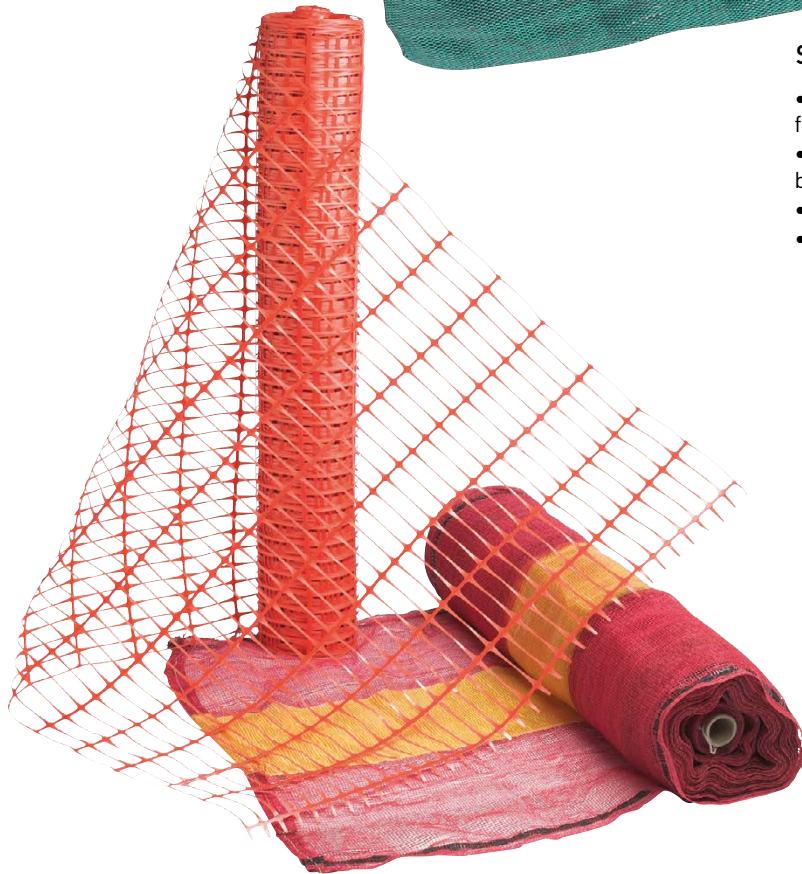

Use a timber stake every 1-2 metres

**SHADECLOTH** ▼

- Shadecloth is a heavy duty UV stabilised fabric that will protect plants from being burnt by the harsh sun and decrease water evaporation
- Can also be used as screening material, scaffold netting and as a wind break material
- Suitable for all applications using light to medium tensioning
- Available in green, black or blue

**SPECIFICATIONS**

- Many more options in shade and sizes
- 1.83 x 50metres, 50% Shade
- 3.66 x 50metres, 50% Shade
- 1.83 x 50metres, 70% Shade
- 3.66 x 50metres, 70% Shade

**SAFETY BARRIER MESH** ▲

- Perfect for the creation of exclusion zones on construction sites
- We offer a choice of Light or Rigid barrier mesh
- Light barrier mesh is a high visibility woven barrier fence suitable for medium term applications
- Rigid barrier mesh is a high visibility extruded barrier mesh suitable for long term use. Durable and re-usable
- Meets Australian Standards

**SPECIFICATIONS**

- Light (Woven) 900mm x 50metres Colour red yellow red
- Heavy (Rigid) 1m x 50metres, Colour - Orange

*Did you know?*

Shadecloth comes in different shade densities and colours

**DY-MARK SPRAY CANS  
MARKING PAINT DISPENSER  
MARUZEN MARKERS & FLAGGING TAPE**

In the field, terrain can be tough, conditions unpredictable and the elements harsh. Surveyors, landscapers, builders and earth movers all need premium, visibility products that go the distance.

Hard wearing, long lasting, easy-to-use paints, tapes and markers from Dy-Mark provide high value for your dollar. Designed with a "non-clogging" trigger, Dy-Mark marking cans are environmentally safe and let you spray to the last drop.

Heavy duty Maruzen markers will continue writing for up to 6 kms on any surface including steel, glass, wood, plastic, paper and even leather while Flagging Tape is a must for all identification requirements.

*What a great idea!*  
No more sore backs or legs from bending. Halves your work time.

**DY-MARK**

- Environmentally safe and user friendly spray which can be used for all commercial marking purposes
- For use on concrete, bitumen, steel, timber, soil & road base
- "Non Clogging" trigger
- Guaranteed to spray to the last drop
- Manufactured to Australian standards for long life and quality

**MARUZEN MARKERS**

- Heavy duty marker that will mark on anything including steel, glass, wood, plastic, paper and leather
- Safety lock valve, stops leaking
- Non toxic to the environment
- Continuous writing, up to 6kms
- Spare tips included

**FLAGGING TAPE**

- Is used for marking out areas for identification requirements including surveyors, schools and sporting bodies
- Economical 100 metres rolls

**SPECIFICATIONS**

**DY-MARK:** 350G spray can, available in various colours including fluorescent

**MARUZEN MARKERS:** Available in black or red

**FLAGGING TAPE:** 25mm x 100metres rolls, Wide range of colours available including fluorescent

**Did you know?**  
We have a specially designed stake rammer which fits a 50x50mm stake

**STEEL FENCE POSTS & ACCESSORIES**

- Long lasting and re-usable
  - Bitumen coated to inhibit rusting
  - Suitable for supporting silt fence, barrier mesh and rural fencing
  - Stake Rammer suits stakes up to 50x50mm
- Also available -
- Round & triangular end caps
  - Rammers & removers for ease of use
  - Fencing wire
  - Wire mesh fencing products

**SPECIFICATIONS**

- 450mm (1'6")
- 600mm (2')
- 900mm (3')
- 1350mm (4'6")
- 1500mm (5')
- 1650mm (5'6")
- 1800mm (6')
- 2400mm (8')
- Medium tensile fencing wire, 300metres x 2.5mm thick
- Tie wire belt pack 95metres

**BUNTING FLAG**

- Makes areas which are cordoned off more noticeable
- Flags are UV stabilised for longer life
- More visible and longer lasting than safety tape
- Ideal for mining applications
- Use to warn of overhead power lines

**SPECIFICATIONS**

- 30metres, alternate red & white flags on white cord

**NIGHTLINE REFLECTIVE FLAG**

- Areas which are marked off can be seen at night
- Most economical day and night reflector
- Tags are designed to last for years
- Alternating red & white tags
- Brilliant reflection from headlights

**SPECIFICATIONS**

- 25metres

**"DANGER" TAPE**

- Red and white with black text

**SPECIFICATIONS**

- 75mmx100m

**JAMBRO PLIER, FASTENERS AND BELT PACK WIRE**

**Plier**

- Fasten fencing to line wires at 25metres per minute
- Saves labour
- Precision casting
- Stainless steel jaws
- Loads quickly and easily

**Fasteners**

- High tensile ring fasteners

## TR4 TURF REINFORCEMENT MESH ▶

TR4 turf reinforcement meshes have been designed, using carefully selected high density plastics, to allow permanent light trafficking – car or pedestrian – to grassed areas. Turf Reinforcement mesh helps to reduce grass wear, rutting and damage by spreading loads and enabling a stronger root base.

TR4 is designed specifically to maximise grass entanglement and reinforce the structure of the grass. The plastic mesh will quickly disappear into the grass becoming invisible while producing a reinforced natural looking grass surface. TR4 mesh is intended to give extra strength and a footprint to the top grass surface protecting the grass root structure and so abrasion is greatly minimised.

Turf Reinforcement is a cost-effective, easy-to-install grass solution ideal for both permanent and temporary applications.

### SPECIFICATIONS

Black 1m x 10m & 2m x 30m rolls  
Weight: 660gsm  
Aperture Size: 24mm  
Part recycled & UV stabilised

#### Tip

Use 5 steel fastening pins per m<sup>2</sup>  
Photo: two weeks after installation

## ECONOGRID 40 ▶

Provides a porous reinforced surface allowing for frequent pedestrian, car and heavy vehicle traffic. An alternative to concrete and asphalt, EconoGrid40 is suitable for both grassed and gravel areas.

The 40mm deep cells on the EconoGrid40 protect the grass roots from damage and the indent cell design allows grass roots to grow unencumbered from one cell to the next resulting in stronger, thicker grass coverage.

Light, environmentally friendly and with a unique interlocking mechanism on each paver, EconoGrid40 is easy to install saving time and labour.

Porous Paving systems reduce the need for expensive drainage solutions and storm water retention requirements.

### SPECIFICATIONS

Grids 638 x 532 x 40mm (3 pavers per m<sup>2</sup>)  
Colour: Green  
Recycled polyethylene

## GRASS REINFORCEMENT MESH ▶

Flexible and long lasting extruded polyethylene mesh

- Ideal for permanent or temporary applications
  - No excavation or soil removal necessarily required
  - Improved traction and grip compared to the standard straight orientated protection meshes
  - Range of uses including, grass overspill car parks, domestic driveways, boat and caravan parking & pet play areas
- GR14 mesh is our heavy-grade 14mm thick, 2kg/m<sup>2</sup> product that is suitable for frequent traffic applications, approx. 8 tonne per axle load tolerance

GR11 mesh is our standard-grade 11mm thick, 1.2kg/m<sup>2</sup> product for frequent and lighter applications, approx. 6 tonne per axle load tolerance

### SPECIFICATIONS

1m x 10m  
2m x 20m  
Colour: Green

#### Tip

Case studies and installation guides available online at [grassreinforcement.com.au](http://grassreinforcement.com.au)

From bamboo and hardwood stakes to tree guards and root control barrier, All Stake Supply has the **product range to meet your needs**. All Stakes Supply's unique plant products are **environmentally friendly and easy to use**.

### TAPENER GUN & ACCESSORIES

Whether your task is in a nursery securing high value standards or in a vineyard ensuring security for valuable vines and trees, Tapener Gun and accessories gives plants a desirable uniform appearance. Tapener Tying Tools are an efficient cost effective way of tying plants, trees and vines. Comprising a hand held gun, which wraps and staples the tape around the object being tied, tapener products are lightweight, durable and easy to use.

- Easy to use hand tying machine for tying plants to support stakes & lines
- Saves time and provides a secure tie
- Very fast, very tidy and highly professional presentation
- We stock Max Tapener guns and accessories including tape, staples and blades

### SPECIFICATIONS

- Cinta Max - 11mm x 26M
- Cinta Max - 11mm x 16M
- Max No 10 Tape - 11mm x 40M
- Max No 15 Tape - 11mm x 30M
- Max No 25 Tape - 11mm x 16M

**Tip**  
Weekly maintenance with WD-40 will prolong the life of your Tapener Gun.

RHEEM TREE TIE

BLACK POLY TREE TIE

### SPECIFICATIONS

- Jute Webbing (50mm x 33metres Roll)
- Rheem Tree Tie (40mm x 50metres Roll)
- Black Poly Tree Tie (50mm x 100metres Roll)

EXAMPLE OF USAGE

### TREE TIES

- When used with stakes, tree ties limit the movement and support newly planted trees
- Jute Webbing tree tie is biodegradable and has a lifespan of up to 12 months
- Rheem tree tie is made from canvicon and is long lasting
- Black Poly tree tie, UV stabilised

**CABLE TIES**

- Easy to use with strong security
- Long lasting

**SPECIFICATIONS**

4.8 x 200mm in pack of 100  
4.8 x 300mm in pack of 100

**BUDDING TAPE**

- Highly UV resistant
- Low visual impact
- Soft stretchable tape used for grafting plants
- Maximum bonding strength for securing the grafted material
- Used for propagation or general tying purposes

**SPECIFICATIONS**

11mm  
13mm  
20mm  
25mm

**RUBBER TIES**

- Quick and effective way of fixing to all types of plants
- Plant friendly, stretching to accommodate for plant growth
- Professional presentation

ANCHOR BAND AT WORK IN A VINEYARD

SCRUB TRELLIS FIXING

**SPECIFICATIONS**

3.5 x 1.7mm x 40mm  
3 x 1.5mm x 70mm  
3 x 1.5mm x 80mm  
3 x 1.5mm x 100mm  
6 x 2mm x 100mm  
5 x 2mm x 200mm  
6 x 2mm x 220mm

**PLASTIC TWISTIES**

- Very economical way of tying plants, or sealing packages
- Available by the spool for cut to size options, or in precut lengths

**SPECIFICATIONS**

750metres Spool

**Precut pack of 1,000**

100mm  
150mm  
200mm  
250mm

**EASY TIES**

- Expand as your plants grow
- Perfect for olives, tomatoes, grapes and all varieties of trees, advanced trees, ornamentals and shrubs
- UV stabilised for maximum life

**SPECIFICATIONS**

Small in pack of 500 2.5mm dia., 120mm length  
Medium in pack of 500 3mm dia., 170mm length  
Large in pack of 100 4mm dia., 310mm length

**CHAINLOCK**

- UV stabilised rubber
- Adjustable tightness
- Soft on plant stems
- Long lasting and reusable

**SPECIFICATIONS**

No.2 Standard 25metres Roll  
No.2 Soft 25metres Roll

**SIMEX PLANT CLIPS**

- A very easy to use unique omega shaped clip for fastening plants to stakes
- Commonly used for orchids and other smaller plants
- Manufactured in Europe

**SPECIFICATIONS**

16mm  
20mm  
25mm

*Did you know?*  
Chainlock allow free space for growth & can be reused

**PLANTER BAGS** ▼

- An extra strong planter bag that will support plant growth for more than two years
- Strap handles are double stitched with UV treated thread for extra strength and life span
- Strap handle design makes moving them easier
- North Symbol printed on one side
- Weight warning printed on bag for a two man lift
- Made from woven UV treated polypropylene

**SPECIFICATIONS**

- 25 Litre
- 45 Litre
- 75 Litre
- 100 Litre
- 150 Litre
- 200 Litre

**Tip**

Planter bags are easily movable, using a forklift tine through the handles.

**PYTHON STAPLE GUN & STAPLES** ▼

- A powerful and professional tacker with long service life – capable of over 10,000 actions
- Recommended for securing textiles, canvas, leather, posters, netting, labels, etc
- Adjustable driving force gives perfect stapling in all material

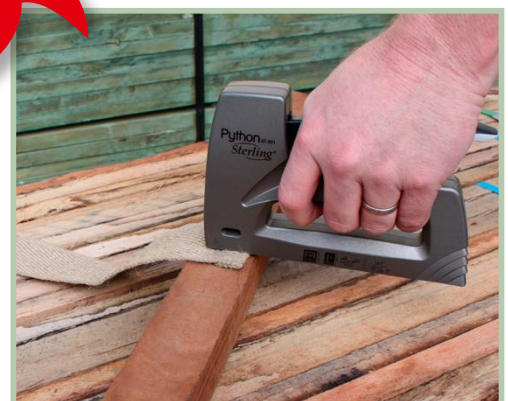

**SPECIFICATIONS**

Python Staples 10mm 3/8"  
Box of 5000

**Tip**

Use to attach Jute Webbing Tree Tie to Hardwood Stakes

All Stake Supply has for many years supplied a range of **quality products** and **sound advice** to the **Revegetation industry/community** within **Australia**. Offering **cost effective** and **environmentally friendly solutions**, All Stake Supply has your needs at its roots.

## PERFECT REVEGETATION RESULTS

A trusted voice in the revegetation industry with over 30 years experience, we suggest Hardwood or Bamboo Stakes, Tree Guards, Jute Matting, Fertiliser Pills and Terraform Plant Establisher for the perfect revegetation result.

### Hardwood or Bamboo Stakes

Hardwood or Bamboo Stakes are an economical way of supporting plants and Tree Guards. Their durability and resistance to decay make them a superior choice when it comes to enhancing new growth.

### Tree Guards

Our range of tree guards is a premium choice to protect vegetation from the elements, herbicide drift, vermin and wildlife attack. Tree Guards increase the level of carbon dioxide and humidity around the leaves of trees and shrubs, promoting growth while reducing UV levels. Growth rates are further enhanced if guards are used in conjunction with Organic Jute Tree Mats.

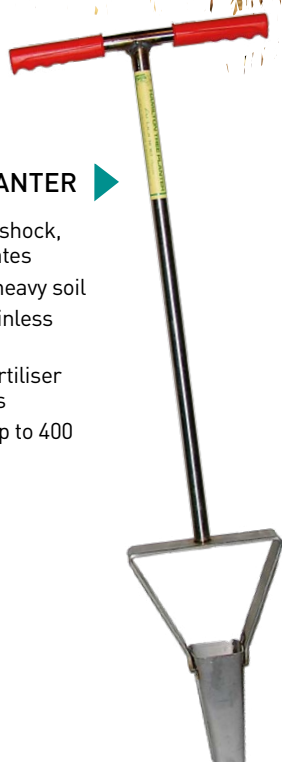

### Jute Matting

Organic Jute Tree Mats are an environmentally friendly way to protect young trees and shrubs particularly during initial establishment. Tree mats retain moisture in the soil, reduce evaporation and provide organic weed control.

## HAMILTON TREEPLANTER

- Reduces transplanting shock, ensuring good survival rates
- Can be used in light & heavy soil
- Has a hard wearing stainless steel head
- Can be used to apply fertiliser tablets to establish plants
- One person can plant up to 400 trees per day

## JUTE WEED MATS

- Environmentally friendly way to protect your trees and shrubs during initial establishment
- Retains moisture in soil and reduces evaporation, increasing the health and size of young trees
- Promotes humus development and provides organic weed control

FASTENING PINS SOLD SEPARATELY

## SPECIFICATIONS

370mm x 370mm, 800gm/m<sup>2</sup>  
600mm x 600mm, 800gm/m<sup>2</sup>

**PLASTIC SLEEVES**

- The most common low cost form of tree guard
- Increases the level of carbon dioxide and humidity around the leaves of trees and shrubs, promoting growth while reducing UV levels
- Made from Green UV stabilised virgin polypropylene
- Three hardwood or bamboo stakes needed for each tree guard

**SPECIFICATIONS**  
 450mm x 350mm  
 800mm x 500mm  
 135mm x 250metres

*Tip*  
 Combined with Jute Mats, Terraform Plant Establisher and fertiliser Plant Pills to obtain perfect results.

**GROWIES™ TREE GUARD RETAIL PACKS**

- Made from Green UV stabilised virgin polypropylene
- Increases the level of carbon dioxide and humidity around the leaves of trees and shrubs, promoting growth while reducing UV levels
- The most common low cost form of tree guard

**SPECIFICATIONS**  
 450mm x 350mm,  
 20 guards per pack

**CORFLUTE GUARD**

- Suitable for protecting Olive Trees, Vines and Natives from the elements, herbicide drift, vermin, and wildlife attack
- Economical and reuseable
- No sharp edges to damage the plant
- Only one hardwood or bamboo stake needed for each tree guard

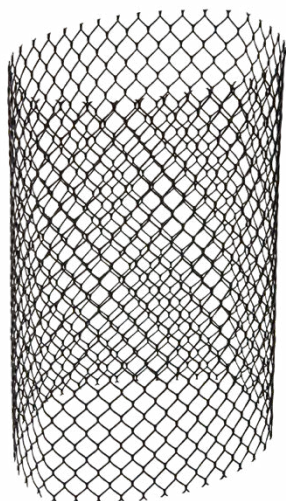

**SPECIFICATIONS**  
 450mm high (140 x 140 x 140mm)  
 Available in green  
 Australian Made

**MESH GUARD**

- A strong UV stabilised polypropylene mesh style guard
- Comes pre-cut or on a roll
- Used by the National Parks and Wildlife Service as a 1.35m tree guard to protect plants from wallabies and rabbits
- Two bamboo, hardwood stakes, or steel fence posts required for each mesh guard

**SPECIFICATIONS**  
 450mm x 400mm (laid flat)  
 600mm x 25metres Roll  
 Mesh Size - 20mm square

*Tip*  
 2-3 bamboo, hardwood stakes or steel fence posts are required for each mesh guard

**CARDBOARD MILK CARTONS**

- Made from surplus recycled milk/juice containers
- Planting slits on both sides to slide stakes through
- The most economical form of tree guard available
- Two bamboo stakes are recommended for each tree guard

**SPECIFICATIONS**  
 Any size made to order  
 Plain guards also available  
 1Lt - height 290mm, width 70mm in box of 500  
 2Lt - height 325mm, width 95mm in box of 250

**VINEGUARD**

**SPECIFICATIONS**  
 135mm x 250metres Roll

- Increases the level of carbon dioxide and humidity around the leaves of trees and shrubs, promoting growth while reducing UV levels
- Made from Green UV stabilised virgin polypropylene

**Bamboo Canes** are an **economical way of supporting plants** and treeguards. **All Stake Supply** has been consistently supplying the **highest quality bamboo** to the Australian market for over 30 years. **All Stake Supply** is **Australia's largest bamboo supplier**.

### "U" SHAPED CANES ▶

Made of the highest quality bamboo, U Shaped Canes are the ideal way to grow, support, shape and display any climbing plant. Natural bamboo is heated and shaped to encourage tendril growth into a larger, bushier end plant. Ideal for tropical climbers, U Shaped Canes are well suited for use in a planter pot and the quality bamboo will ensure weather resistance if positioned outside during the warm summer months.

- A low cost solution to a plant trellis

#### SPECIFICATIONS

- 6-8mm 45cm,
- 8-10mm 60cm,
- 8-10mm 75cm
- 8-10mm 90cm,
- 10-12mm 105cm

### ROUND BAMBOO CANES ▼

- Natural bamboo canes are a strong and durable wood which is used for plant and tree guard supports
- Bamboo canes are an economical alternative to hardwood stakes for small to medium sized plants
- Smooth and non abrasive
- Available in assorted thicknesses and heights
- Natural colour (pictured)
- Australia's largest supplier of bamboo

#### SPECIFICATIONS

- 6-8mm 45cm
- 6-8mm 60cm
- 7-9mm 105cm
- 8-10mm 60cm
- 8-10mm 75cm
- 8-10mm 90cm
- 8-10mm 120cm
- 8-10mm 150cm
- 10-12mm 60cm
- 10-12mm 75cm
- 10-12mm 90cm
- 10-12mm 120cm
- 12-14mm 150cm
- 12-14mm 180cm
- 14-16mm 120cm
- 16-18mm 150cm
- 16-18mm 180cm
- 20-22mm 180cm
- 20-22mm 240cm
- 24-26mm 300cm

### FLOWER STICKS ▼

- Machine rounded bamboo, forming a solid flower stick
- Ideal as a support for potted plants
- Inexpensive and easy to use
- Available in Green
- Green canes are coloured with vegetable dye
- Available with pointed tip

#### SPECIFICATIONS

- 2mm x 25cm
- 3mm x 30cm
- 3.5mm x 35cm
- 4mm x 40cm
- 4.5mm x 45cm
- 5mm x 60cm
- 6mm x 75cm
- 6.5mm x 90cm

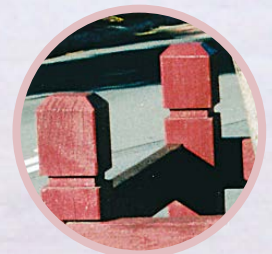

All Stake Supply has for **over 40 years** consistently met the demand for **quality hardwood stakes** from the many industries we service. From hardwood stakes for the **construction industry** to tomato stakes for **commercial growers**, All Stake Supply has it covered.

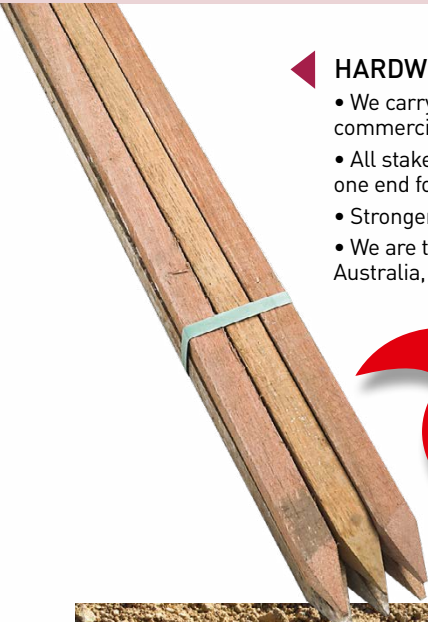

#### ◀ TIMBER TREE FRAMES

- Professional presentation for street plantings
- We manufacture to your specifications
- Fancy top and routing available

**HARDWOOD STAKES**

- We carry a range of quality hardwood suitable for commercial or residential use
- All stakes 17mm x 17mm and larger are pointed at one end for easier penetration into the ground
- Stronger and longer lasting than bamboo stakes
- We are the largest supplier of hardwood stakes in Australia, and with the widest range

*Did you know,*  
we only source timber that has been derived from environmentally sustainable resources

**SPECIFICATIONS**

- 12x12mm - 0.6M, 0.75M, 0.9M, 1.2M
- 17x17mm - 0.75M, 0.9M, 1.05M, 1.2M, 1.5M, 1.8M
- 25x25mm - 0.3M, 0.6M, 0.9M, 1.2M, 1.5M, 1.8M, 2.1M, 2.4M
- 38x38mm - 0.3M, 0.45M, 0.6M, 0.75M, 0.9M, 1.05M, 1.2M, 1.35M, 1.5M, 1.8M, 2.1M, 2.4M
- 50x25mm - 0.3M, 0.45M, 0.6M, 0.75M, 0.9M, 1.2M, 1.35M, 1.5M, 1.8M
- 50x50mm - 0.15M, 0.225M, 0.3M, 0.375M, 0.45M, 0.6M, 0.75M, 0.9M, 1.2M, 1.5M, 1.8M, 2.1M, 2.4M

**SURVEY PEGS**

- Quality hardwood graded and measured to specifications
- Painted white

**SPECIFICATIONS**

**Indicator/Surveyors Pegs - incl point & paint**

- 50x13mm 0.45metre
- 50x13mm 0.6metre
- 50x13mm 0.75metre
- 50x13mm 0.9metre

**Painted & Unpainted**

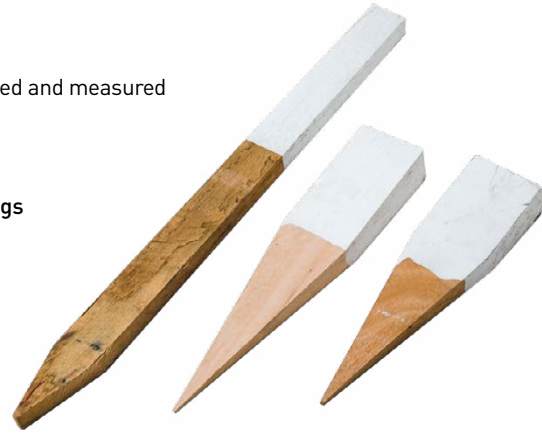

- 50x50mm 0.15metre
- 50x50mm 0.225metre

**Boundary Pegs - incl point, paint, chamfer**

- 75x50mm 0.3metre
- 75x50mm 0.35metre
- 75x50mm 0.4metre

**Residential Pegs - incl point, paint, chamfer**

- 75x75mm 0.35metre
- 75x75mm 0.45metre

**TIMBER EDGING**

- Treated Pine
- Used as retaining edge for concreting and landscaping
- Treated to H4 for longer below ground life
- Available in hardwood, various sizes and lengths
- Treatment types, CCA, LOSP, ACQ
- Logs & sleepers

**SPECIFICATIONS**

100x25mm x 4.8metres

**TREATED PINE PEGS**

- Ideal for holding timber edging
- Treated to H4 for longer below ground life

**SPECIFICATIONS**

- 50x50mm 0.45metres
- 50x50mm 0.6metres
- 50x50mm 0.9metres

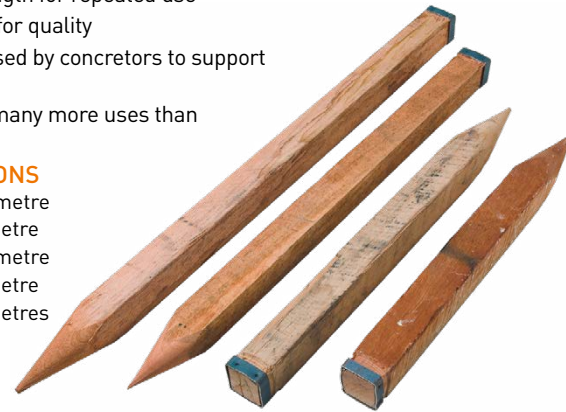

**STEEL CAPPED CONCRETORS PEGS**

- Quality hardwood peg with a steel band to give extra strength for repeated use
- Hand picked for quality
- Commonly used by concretors to support formwork
- Guaranteed many more uses than uncapped pegs

**SPECIFICATIONS**

- 50x50mm 0.45metre
- 50x50mm 0.6metre
- 50x50mm 0.75metre
- 50x50mm 0.9metre
- 50x50mm 1.2metres

**PLUMBERS TAP STANDS**

- Quality hardwood with chamfered top
- Hand picked for quality
- Long point for easy installation

**SPECIFICATIONS**

- 75x50mm x 0.9metres
- 75x50mm x 1.2metres

TAP FITTING FOR ILLUSTRATION PURPOSE

**GUIDE POSTS**

- Made from hardwood and painted white
- Red and white reflectors placed on each side

**SPECIFICATIONS**

100x50mm x 1.4metres

**GENERAL PURPOSE FERTILISER** ▶

**No.17 Lawn Food (10-3-4.5) +Iron, Calcium, Magnesium**

Paton No. 17 Lawn food is suitable for both warm and cool season grasses. High organic component improves soil structure and health. Contains extra Potassium, Trace Elements and essential nutrients for growth and development of lawns

**Multipurpose Fertiliser (10.5-3.5-5.5)**

General purpose fertiliser to promote plant growth, fruit and flower development. Suitable for fruit, vegetables, lawn, shrubs and flowers.

**Fruit and Flowering Food (8.8-2.9-8.6) +Magnesium**

Ideal formulation for all types of fruit trees and flowering plants. Complete range of essential nutrients including Magnesium. Contains Potassium as Sulphate

**Banana Special (7.2-5.6-5) + Magnesium**

Proven, organically based general purpose formulation suitable for vegetables and fruit trees but can also be used for shrubs and lawns.

**Native Plant Food (9.2-2.3-5.7) + Trace Elements**

Low Phosphorus plant food suitable for most Australian Native plants. Contains most essential Trace Elements

**Sulphate of Ammonia (20.5-0-0)**

Provides a quick and economical boost to lawns. Contains highly soluble Nitrogen source. Should be used in conjunction with a complete NPK fertiliser.

**Azalea and Camellia Food (7.6-3.4-10.7) + Trace Elements**

Specifically blended to suit the needs of Azaleas, Camellias, Rhododendrons, Daphnes and Gardenias. Organically based formulation containing a complete range of essential nutrients.

**Blood and Bone (5.4-5.8-0.2)**

Organic based formulation suitable for a wide variety of plants. Rejuvenates and fortifies tired soils by replenishing essential soil microbes.

**100% Natural Gypsum Claybreaker**

Paton Gypsum is a premium quality gypsum for breaking up heavy clay soils, improving water efficiency and improving water penetration.

**TROFORTE** ▶

Troforte® MMM is a relatively new approach to the cultivation of virtually all plants in that we emphasize on use of proven biological coating on specifically engineered mineral base containing up to 60 natural minerals, together with various forms of natural and chemical Slow/Controlled release fertilisers. These in turn maintain optimal nutrient availability to feed the crop as required and most efficient use of fertilisers.

**SPECIFICATIONS**

TROFORTE NATIVE 9 Month, 18 - 1 - 10 + T.E.

TROFORTE TREE & SHRUB 9 Month, 16 - 3 - 9 + T.E.

TROFORTE WOODY PLANT 12 Month, 16 - 3 - 9 + T.E.

Each available in 20kg bags

**SPECIFICATIONS**  
12.5kg

**TERRAFORM™ PLANT ESTABLISHER** ▲

- Triple action soil-conditioning formulation proven to maximise the speed at which seeds take root
- Promotes the root development of young plants and helps mature plants flourish
- Unique formulation of three essential growth enhancers; soil conditioner, water economiser and nutritional supplements

**TERRAFORM™ OCEANCOMPLEX** ▲

- Stimulates plant vigour facilitating plant rescue during periods of stress
- Stimulates micro-organism activity in the soil
- Improves crop quality, associated plant/fruit shelf-life and frost resistance protection
- Reduces maturation time

**SPECIFICATIONS**  
20litres

◀ **FERTILISER - PLANT PILLS**

- Slow release tablet that delivers a measured dose of nutrients that will last for one year
- Non burning, non leaching
- Ideal for landscape projects, commercial forestry and fruit tree crops
- Tablets available in 10g and 20g sizes

**SPECIFICATIONS**  
N : P : K ratio 20:1:10 + trace elements in 10kg box

**SATURAIID® SOIL & TURF WETTING AGENT** ▲

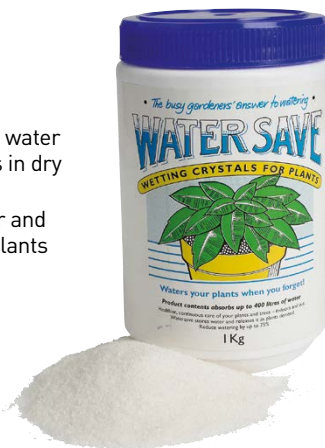

- Increases the rate of water uptake in the soil
- Assists in rapid root development and improves plant growth
- Increases nutrient distribution in the soil profile
- Granular formulation is the preferred option for longevity (up to 6-8 months)

**SPECIFICATIONS**  
20litres & 20kg

**WATER CRYSTALS** ▶

- "Watersave" wetting crystals store water around the roots for plants to access in dry conditions
- Holds 400 times its weight in water and will release 95% of stored water to plants
- Reduces watering frequency

**SPECIFICATIONS**  
750g, 5kg or 25kg

CROP PROTECTION CHEMICALS

**Dismiss™** is a pre-emergent, granular, ornamental herbicide combining two proven active ingredients in one granule. The combination provides broad spectrum coverage across both broadleaf and grass weeds.

- It provides up to 3 months weed control over 40 different weed species in potted and open grown ornamentals
- This product is safe and cost effective and will increase the aesthetic and commercial value of your potted plants because they are weed free.
- Easy to apply granular formulation.
- Packaged in 20 kg bucket
- Shaker Jug application – The Dismiss™ calibrated shaker jug can be used for accurate rate of application and distribution of Dismiss to individual pots.

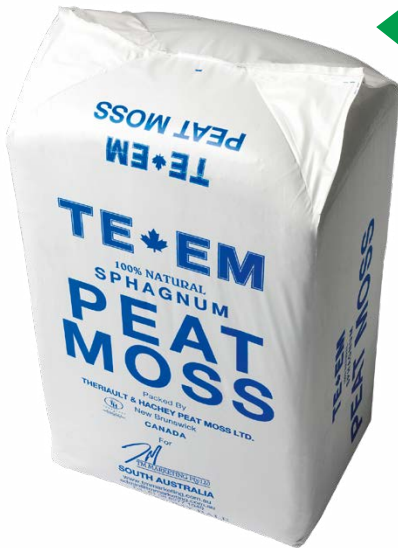

**Roundup Biactive®** has been specifically formulated for use in environmentally sensitive areas. This unique formulation contains an 'aquatic approved' surfactant, allowing for use in sensitive areas such as around streams, creeks, dams, channels and drains.

Roundup Biactive® controls a broad spectrum of annual, perennial and aquatic weeds.

The active ingredient in Roundup is Glyphosate. Glyphosate is a broad-spectrum, non selective, systemic herbicide used to kill weeds.

Available in 20 litre pack sizes.

PLANT PROPAGATION - PEAT MOSS

- Premium grade Canadian sphagnum peat
- Yields excellent water and air exchange capacity
- Ideal cation exchange capacity
- Provides excellent buffering capabilities
- Saves water by retaining moisture and releasing it slowly
- Saves on fertiliser by reducing nutrient leaching

**SPECIFICATIONS**  
100 Litres compressed

VERMICULITE

- Ultra light weight
- Slightly alkaline (neutralised with peat)
- High cation-exchange (or buffering exchange)
- Sterile, inert & pH neutral

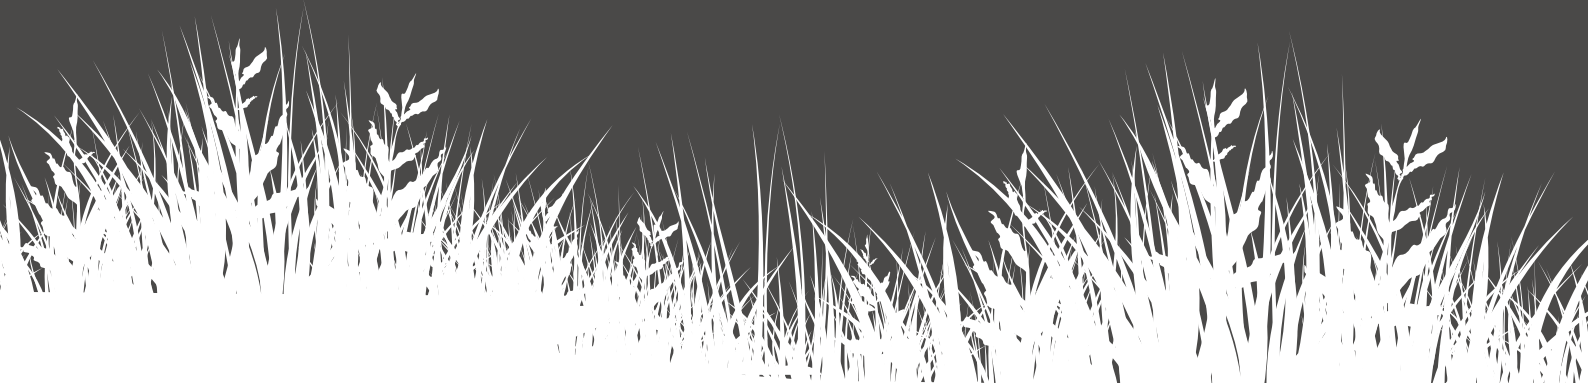

**SPECIFICATIONS**  
100 Litres

PERLITE

- Improves soil porosity, allowing air to reach even the tiniest of roots
- Improves the soil's capacity for moisture retention
- Non toxic
- Neutral PH and sterile
- Light and easy to use

**SPECIFICATIONS**  
100 Litre Bags  
Available in medium & coarse grades
