

Plastic Sleeve Tree Guards

FEATURES / BENEFITS:

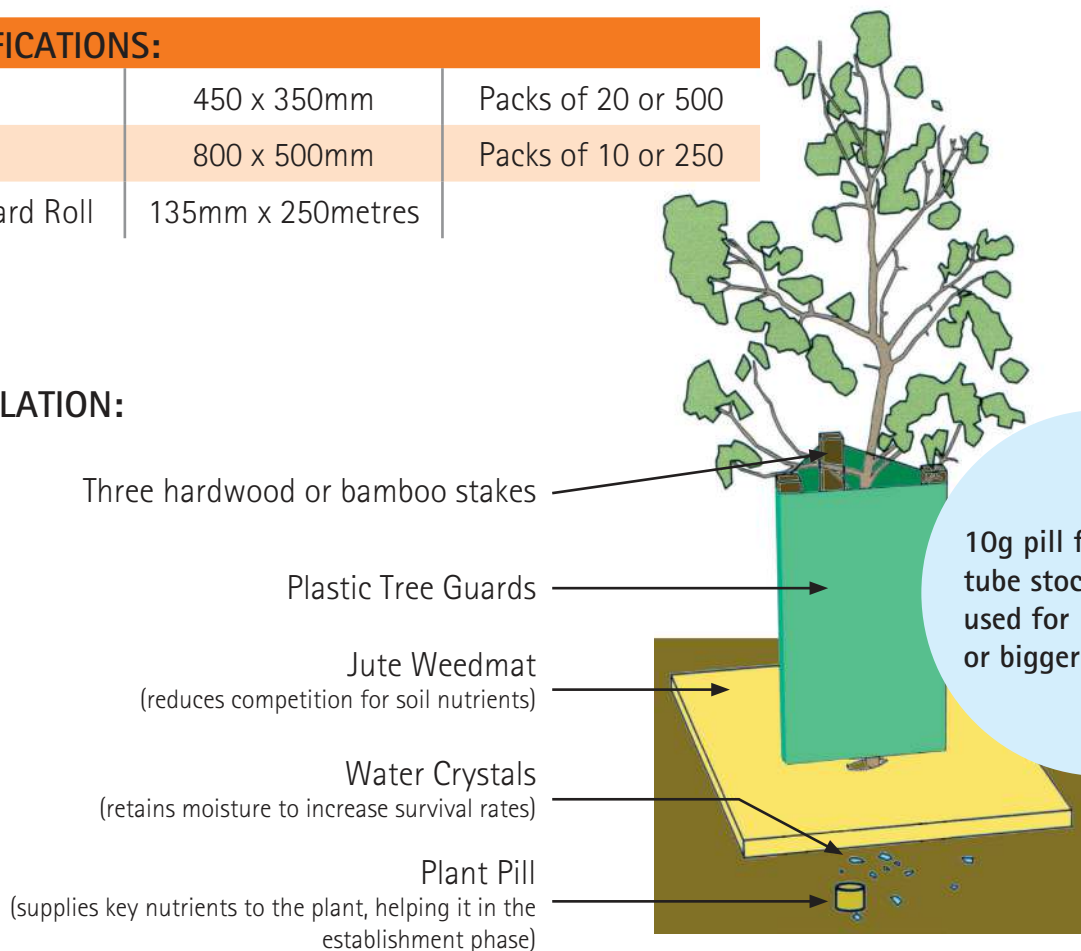

- The most common low cost form of treeguard
- Tree Guards increase the level of carbon dioxide and humidity around the leaves of trees and shrubs, promoting growth while reducing UV levels
- Popular guard because it is re-usable and robust
- Each guard is made from Green UV stabilised virgin polyethylene
- Each guard requires three hardwood or bamboo stakes to support its shape
- We recommend using a Jute Weedmat 370mm x 370mm or 600mm x 600mm and a 10-12mm x 75cm bamboo cane

SPECIFICATIONS:

Guard	450 x 350mm	Packs of 20 or 500
Guard	800 x 500mm	Packs of 10 or 250
