

Coir Matting

DESCRIPTION:

Coir matting is a 100% biodegradable natural coconut fibre product with an open weave. It is spun and woven for extra strength and will last longer than equivalent jute matting products.

When used with vegetation it is mechanically strong enough to hold slopes together even after heavy rain. Also promotes the growth of new plants and stops the topsoil from drying out and damaging new growth.

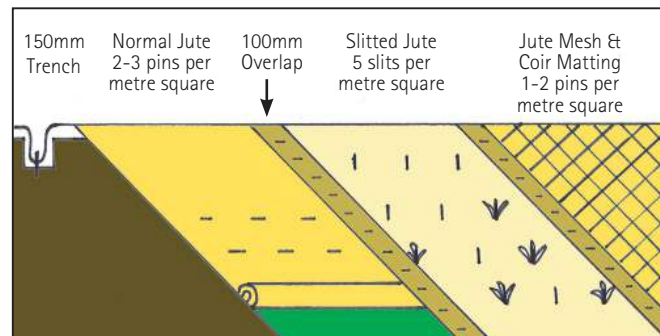

Coir matting resists temperature and wind extremes while retaining humidity and reducing soil erosion.

APPLICATIONS:

- Landscaping or roadsides
- Slopes
- Roadsides
- Natural regeneration sites
- Mining
- Coastal areas with high winds
- Wetlands and riparian slopes
- Can be fastened with a "U" shaped pin

INSTALLATION:

All Stake Supply Coir Matting

FEATURES / BENEFITS:

- Promotes growth of new plants
- Reduces soil erosion
- Retains moisture
- 100% Biodegradable
- Lasts up to five years with optimum seasonal conditions

SPECIFICATIONS:

Size	2m x 25m		
Type	Light	Medium	Heavy
Thickness	4.27mm	7.97mm	9.12mm
Flow velocity	2.5m/sec	3m/sec	4.7m/sec
Tensile strength	1208 x 690kg/m	1608 x 746kg/m	2450 x 990kg/m
Weight	400gsm	700gsm	900gsm
Density material	62%	57%	41%
