

Woven Poly Weedmat

DESCRIPTION:

Woven Poly Weedmat is a polyethylene matting made for weed control in nurseries, landscaping and horticulture.

The weedmat structure is tight enough to prevent light reaching the soil so weeds cannot grow, but allows air and water to pass through to prevent soil souring.

APPLICATIONS:

- Landscaping and roadsides
- Nurseries
- Weed control in garden beds

FEATURES / BENEFITS:

- The tight weave prevents light reaching the soil
- Prevents weed growth
- Allows air and water to pass through the weave
- Exceeds Australian Standards
- Economical and lasts up to 12 months
- Grid line is used by nurseries for aligning pots

SPECIFICATIONS:

Roll	0.9m x 50m	80gsm
Roll	1.83m x 50m	80gsm
Roll With Grid Line	3.66m x 100m	120gsm
Roll With Grid Line	5m x 100m	120gsm
